Subject: Compliance Recall 72M6 - Center Rear Seat Belt Wiring Harness

Dear Audi Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Audi has decided that certain 2022 model year Audi vehicles fail to conform to Federal Motor Vehicle Safety Standard No. 225, *Child Restraint Anchorage Systems*. Our records show that you are the owner of a vehicle affected by this action.

What is the issue? The wiring harness for the center rear seat belt buckle may be routed incorrectly and interfere with the inner lower LATCH anchor of the right rear seat. This may obstruct the accessibility of the lower child seat anchors and inhibit the child seat from being properly secured. Due to one of the lower child seat anchors not being accessible, a child seat on the right rear seat may not be properly secured increasing the risk of injury in case of a crash.

What will we do? To correct this noncompliance, your authorized Audi dealer will inspect the wiring harness for the center rear seat belt buckle for damage and correctly route and secure it on the affected vehicles if necessary. This work will take about an hour to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.

What should you do? Please contact your authorized Audi dealer without delay to schedule this recall repair. For your convenience, you can also visit www.audiusa.com and click on the "Find a Dealer" link to locate a dealer near you and schedule this service.
