Subject: Compliance Recall 06E7 - Owner's Manual Information – Tire Pressures

Dear Audi Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Audi has decided that certain 2022 model year Audi vehicles fail to conform to Federal Regulation 49 CFR § 575.6(a)(4) regarding tire pressure information. Our records show that you are the owner of a vehicle affected by this action.

What is the issue?

The units for the values of the tire pressure table in the owner's manual (kPa and PSI) were assigned to the wrong columns and therefore do not match the actual numbers.

The tire pressure values on the B-pillar "Tire and Loading Information" label are correct; however, if a customer tries to inflate the tires solely according to the tire pressure table in the owner's manual, the tires could be either over- or under-inflated, which could lead to a negative effect on driving stability, causing a loss of vehicle control which might lead to a crash.

What will we do?

To correct this noncompliance, we have enclosed an owner's manual insert that contains the corrected information regarding tire pressures. We ask you to please review this information and keep it with your vehicle owner's manual for future reference.

If you prefer to visit your authorized Audi dealer to have them place this insert in your vehicle, you are welcome to schedule an appointment. This work will take just a few minutes for your dealer to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.

What should you do?
