Dear Mercedes-Benz Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Mercedes-Benz AG ("MBAG"), the manufacturer of Mercedes-Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain Model Year ("MY") 2020 GLE-Class vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

### What is the **CONCERN**?

In certain MY 2020 GLE-Class vehicles, the wiring harness to the prefuse box in the engine compartment might not be properly secured according to current production specifications. The wiring harness to the prefuse box might experience vibrations while driving. This might unintentionally deactivate fused components (e.g. power steering assist, headlights, wiper system), which could increase the risk of a crash. When the issue occurs, the driver might notice a corresponding warning message in the instrument cluster for the system or component affected.

### What will your **DEALER** DO?

An authorized Mercedes-Benz dealer will inspect and replace the prefuse box if necessary on the affected vehicles. **This service will be provided free of charge.** We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the minimum repair time can be less than 1.5 hours, your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes-Benz dealer will also check for other repair measures which might be applicable to your vehicle and this may increase the required working time.

### What should **YOU** DO?
