## NHTSA Recall No. 22V-103

[DATE]

[Customer Name]

[Address]

[City, State, ZIP]

This important safety recall notice applies to your vehicle with the following Vehicle Identification Number (“VIN”):

[ENTER VIN]

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

McLaren Automotive Incorporated (“**McLaren**”) has decided that a defect that relates to motor vehicle safety exists in certain Model Year 2019 – 2021 McLaren GT vehicles. According to our records, you are the owner of one of those vehicles.

### WHAT IS THE ISSUE?

McLaren has determined that there is a potential risk that the connection between the driver airbag and the occupant restraint controller may not have been fully engaged, whereby the connector is connected but the secondary locking tab is not locked. It is possible that the airbag warning light may not illuminate even though the airbag is not operational. In the event of an accident, if the connection is not fully engaged, the driver airbag may not deploy, which could lead to more severe injuries.

### WHAT McLAREN WILL DO

Your McLaren retailer will inspect your vehicle to determine whether the connector is engaged and the secondary tab is locked. If the connection is not fully engaged, the dealer will correct the problem.

**This remedy will be performed at no cost to you.**

## WHAT YOU SHOULD DO

At your earliest convenience, please call your McLaren dealer to schedule an appointment to have the remedy performed. We estimate that the procedure will take less than 15 minutes to complete.
