Dear Valued Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Daimler Trucks North America LLC (DTNA), on behalf of its wholly owned subsidiary, Freightliner Custom Chassis Corporation, and Jayco motorized division have decided that a defect, which relates to motor vehicle safety, exists on certain model year 2018-2023 Entegra Accolade, Accolade XL, Jayco Seneca, Seneca Prestige Class C motorhomes built with certain Freightliner model Years 2017 - 2023 FCCC MBC, MC, MT55, S2C, S2G, S2RV, XBR, XBS, XCL, XCM, XCR, and XCS chassis manufactured February 20, 2017, through November 18, 2021, and equipped with a valve stem extension and stabilizer configured with a specific tire valve stem and wheel combination.

Reason for this recall

Certain chassis may have been built with the tire valve stem extension for the inner wheel contacting the outer wheel rim opening, potentially damaging the valve stem resulting in a loss of air pressure in the inner tire. A loss of air pressure in the inner tire on a motorhome with a single drive axle may overload the outer tire and increase the risk of a crash.

Recall Remedy

Repairs will be performed by Daimler Trucks North America authorized service facilities. The inner valve stem extension and stabilizer will be removed. The Recall will take approximately one hour and will be performed at no charge to you.
