Dear Mercedes Benz Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Mercedes Benz AG ("MBAG"), the manufacturer of Mercedes Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain Model Year ("MY") 2022 EQS Class and 2021 S Class vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

What is the CONCERN?

In certain Model Year ("MY") 2022 EQS Class and 2021 S Class vehicles, the rear signal acquisition and actuation module ("SAM") software might not meet current production specifications. An incorrect initialization of the rear SAM might occur at vehicle start, which may restrict intended functions of the control unit. This might disable the rear turn signals, hazard lights, and reverse lights, which could increase the risk of a crash. Should this occur, the driver is made aware by corresponding warning messages in the instrument cluster.

What will your DEALER DO?

An authorized Mercedes Benz dealer will update the rear SAM software on the affected vehicles, according to current production specifications. This service will be provided free of charge. We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the minimum repair time can be less than 1 hour, your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes Benz dealer will also check for other repair measures which might be applicable to your vehicle and this may increase the required working time.

What should YOU DO?
