This notice applies to your vehicle, VIN: XXXXXXXXXXXXXXXXXXXX

Dear <FirstName LastName,>

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Hyundai has decided that a defect, which relates to motor vehicle safety, exists in certain 2013 – 2014 Sonata vehicles. Hyundai is initiating Recall 227, a safety recall to repair a condition involving the fuel delivery system in these vehicles in the U.S. and Canadian markets. Hyundai is conducting this action to ensure the safety of its vehicles for Hyundai customers. Our records indicate that your vehicle is affected by this recall campaign.

What is the problem?

The subject vehicles may not have received a replacement fuel hose under prior Recall 189 (NHTSA Recall 20V-121). The fuel hose connecting the low-pressure fuel pump to the direct injection fuel pump could crack over time from the heat in the engine compartment. A damaged fuel line could result in a fuel leak, increasing the risk of an engine compartment fire.

What will Hyundai do?

Your Hyundai dealer will replace the fuel hose connecting the low-pressure fuel line under the vehicle to the direct injection fuel pump. This procedure will be performed at **NO CHARGE** to you.

What should you do?

Please contact your nearest Hyundai dealer to schedule this procedure by visiting www.Hyundaiusa.com/dealer-locator or calling 1-855-371-9460.

The actual time required to perform this procedure on your vehicle will take less than two hours. Therefore, we recommend scheduling a service appointment to minimize inconvenience.

If you have other questions
