**Recall Notice**

### **Subject: Cascadia Brake ECU Accessory Component**

This notice is sent to you in accordance with the requirements of the *National Traffic and Motor Vehicle Safety Act*.

Daimler Truck North America LLC (DTNA), on behalf of its Freightliner Trucks Division, has decided that certain model year 2022 Freightliner Cascadia vehicles manufactured October 28, 2021, through December 17, 2021, fail to conform to Federal Motor Vehicle Safety Standard No. 121 "Air Brake Systems" and No. 136 "Electronic Stability Control Systems on Heavy Vehicles."

The antilock brakes (ABS) and electronic stability control (ESC) may be manually deactivated. Deactivated ABS and ESC could lead to loss of braking or stability control, which may increase the risk of a crash.

In order to address the noncompliance that is the subject of this recall, DTNA is offering to repurchase the vehicle(s). This repurchase (buyback) program is offered to you free of charge. Please contact DTNA directly in order to make arrangements for a vehicle repurchase.

If you do not own the vehicle that corresponds to the identification number(s) which appears on the Recall Notification, please return the notification to the Warranty Campaigns Department with any information you can furnish that will assist us in locating the present owner. If you have leased this vehicle, Federal law requires that you forward this notice to the lessee within ten days. If you are a subsequent stage manufacturer, Federal law requires that you forward this notice to your distributors and retail outlets within five working days. If you have paid to have this recall condition corrected prior to this notice, you may be eligible to receive reimbursement. Please see the reverse side of this notice for details.
