Subject: Safety Recall 66N8 –Trailer Hitch Bolts

Dear Volkswagen Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Volkswagen has decided that a defect, which relates to motor vehicle safety, exists in certain 2022 model year Volkswagen vehicles. Our records show that you are the owner of a vehicle affected by this action.

What is the issue?

The trailer hitch bolts have may not have been sufficiently tightened. The bolts may begin to loosen which will lead to a rattling noise. If the problem persists, the loose bolt may fall out, or the remaining bolts may be over-stressed which could lead to separation of the trailer hitch during towing. This may increase the risk for a crash for the following traffic.

What will we do?

To correct this defect, your authorized Volkswagen dealer will tighten the trailer hitch bolts to the proper specification. This work will take about an hour to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.

What should you do?

Please contact your authorized Volkswagen dealer without delay to schedule this recall work. To set up an appointment online, please visit www.vw.com/find-a-dealer.

Precautions you should take

Until this recall work has been completed, owners should not tow a trailer with their vehicle. If the condition is present in the vehicle, owners may notice a rattling noise from the rear of the vehicle. If this happens, owners are advised to contact an authorized Volkswagen dealer without delay to have the vehicle inspected/repaired.
