NHTSA RECALL 22V-666

Dear Rogue Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Nissan has decided that certain 2021-2022 Model Year Nissan Rogue vehicles fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) number 208, "Occupant Crash Protection" and FMVSS number 209, "Seat Belt Assemblies." Our records indicate that you own or lease the Nissan vehicle subject to this recall as identified by the VIN on the inside of this notice.

Reason for Recall
Motivo del Retiro

Certain rear seat belts for the left-hand and right-hand rear seats in your vehicle may not retract properly and could be loose. The seat belt's internal spool can bind, which could cause difficulty or inability to retract the seat belt properly, potentially preventing its use. In this condition, the seat belt assembly may not comply with FMVSS requirements for Occupant Crash Protection and Seat Belts. In the event of a crash, the seat belt may not perform as intended, increasing the risk of loss of seat belt restraint and increased injury.

What Nissan Will Do
Qué Hará Nissan

Your Nissan dealer will inspect both left-hand and right-hand rear seat belts and replace as necessary. This free service could take up to two (2) hours to complete. However, your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.
