IMPORTANT

- A remedy is available now.
- You should contact your local Gradall/Vacall dealer or Gradall/Vacall Service Department or Warranty Administrator to arrange for this free repair to be completed on your vehicle.

Why is AllJetVac vehicle recalled?

The clevis which attaches the hose reel tilt cylinder rod to the hose reel is not the proper length to allow for full engagement. If the hose reel cylinder rod is not properly engaged with the clevis, the hose reel could tilt forward, increasing the risk of injury to individuals.

What will we do?

The corrective action is to replace the shortened clevis with a lengthened clevis. This remedy will be performed free of charge. The repair takes about 1 hour to complete. Because of service scheduling requirements, it is likely that the dealer will need your AllJetVac vehicle for a period of time longer than this actual repair performance time.
