Code Visibility	On or about June 22, 2022, the campaign code was applied to affected vehicles.
Owner Notification	Owner notification will take place in June 2022. Owner letter examples are included in this bulletin for your reference.
Additional Information	Please alert everyone in your dealership about this action, including Sales, Service, Parts and Accounting personnel. Contact Warranty if you have any questions.
	IMPORTANT REMINDER ON VEHICLES AFFECTED BY SAFETY & COMPLIANCE RECALL
	<u>New Vehicles in Dealer Inventory:</u> It is a violation of federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification under a sale or lease until the defect or noncompliance is remedied. By law, dealers must correct, prior to delivery for sale or lease, any vehicle that fails to comply with an applicable Federal Motor Vehicle Safety Standard or that contains a defect relating to motor vehicle safety.
	<u>Pre-Owned Vehicles in Dealer Inventory:</u> Dealers should not deliver any pre-owned vehicles in their inventory which are involved in a safety or compliance recall until the defect has been remedied.
	Dealers must ensure that every affected inventory vehicle has this campaign completed before delivery to consumers.
	Fill out and affix Campaign Completion Label (CAMP 010 000) after work is complete. Labels can be ordered at no cost via the Compliance Label Ordering portal at <u>www.vwhub.com</u> .

Claim Entry Instructions

The labor times listed here may differ from the labor operations and labor times listed in ELSA.

After campaign has been completed, enter claim as soon as possible to help prevent work from being duplicated elsewhere. Attach the ELSA screen print showing action <u>open on the day of repair</u> to the repair order. If customer refused campaign work:

- ✓ U.S. dealers: Submit request via WISE under the Campaigns/Update/Recall Closure option.
- ✓ <u>Canada dealers:</u> Upload the repair order [signed by customer] to Volkswagen WIN/Operations/Campaign Closure.

Customer Letter Example (USA)

This notice applies to your vehicle: <MODEL YEAR> <BRAND> <CARLINE>, <VIN>

NHTSA: 22V152

Subject: Safety Recall 97GF - Front Door Wiring Harness

Dear Volkswagen Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Volkswagen has decided that a defect, which relates to motor vehicle safety, exists in certain 2019-2023 model year Volkswagen vehicles. Our records show that you are the owner of a vehicle affected by this action.

What is the issue?	In the event of a side crash, when the side airbag deployment may be necessary, the side airbag may deploy later than designed, which can lead to an increased risk of injury to vehicle occupants. This issue may be caused by excessive micromovement, leading to fretting corrosion of the door wiring harness terminal contacts.
What will we do?	To identify and correct this defect, authorized Volkswagen dealers will check both front doors to determine if diagnostic trouble (fault) code(s) specific to the affected wiring harness are present. If the fault code(s) are present for a front door, the affected wiring harness will be replaced in that door. Harnesses will be modified with a zip tie to secure them, and a stabilizing compound will be applied to the terminal ends of the affected wiring harness connectors.
	If fault codes are not found, the existing wiring harness will be modified with a zip tie to secure it and a stabilizing compound will be applied to the terminal ends of the affected wiring harness connector(s).
	This work will take about two hours to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.
What should you do?	Please contact your authorized Volkswagen dealer without delay to schedule this recall work. To set up an appointment online, please visit www.vw.com/find-a-dealer .
Precautions you should take	If the recall condition is present in the vehicle, the airbag warning light will illuminate if a malfunction is detected. Other symptoms of a sporadic interruption of the affected electrical connection can be: inadvertently rolling down windows, inadvertent park brake engagement at low speeds (below approximately 3km/h or 1.8 mph), warning regarding faulty door sensor. Customers experiencing any of these conditions are advised to contact an authorized Volkswagen dealer to have their vehicle diagnosed/repaired without delay.
Lease vehicles and address changes	If you are the lessor and registered owner of the vehicle identified in this action, the law requires you to forward this letter immediately via first-class mail to the lessee within ten (10) days of receipt. If you have changed your address or sold the vehicle, please fill out the enclosed prepaid Owner Reply card and mail it to us so we can update our records.
Reimbursement of Expenses	If you have previously paid for repairs relating to the condition described in this letter, please refer to the enclosed form that explains how to request reimbursement.
Can we assist you further?	If your authorized Volkswagen dealer fails or is unable to complete this work free of charge within a reasonable time, or if you should have any questions about this communication, please reach out to us using your preferred method of communication at www.vw.com/contact or by calling us at 800-893-5298.
Checking your vehicle for open Recalls and Service Campaigns	To check your vehicle's eligibility for repair under this or any other recall/service campaign, please visit <u>www.vw.com/owners/recalls</u> and enter your Vehicle Identification Number (VIN) into the Recall/Service Campaign Lookup tool.

If you still cannot obtain satisfaction, you may file a complaint with: The Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590; or call the toll-free Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153); or go to http://www.safercar.gov.

We apologize for any inconvenience this matter may cause; however we are taking this action to help ensure your safety and continued satisfaction with your vehicle.

Sincerely,

Volkswagen Customer Protection

Customer Letter Example (Canada)

This notice applies to your vehicle: <MODEL YEAR> <BRAND> <CARLINE>, <VIN>

Transport Canada Recall: 2022-110

Subject: Safety Recall 97GF – Front Door Wiring Harness

Dear Volkswagen Owner,

This notice is sent to you in accordance with the requirements of the *Motor Vehicle Safety Act*. This is to inform you that your vehicle may contain a defect that could affect the safety of a person. Our records show that you are the owner of a vehicle affected by this action.

What is the issue?	In the event of a side crash, when the side airbag deployment may be necessary, the side airbag may deploy later than designed, which can lead to an increased risk of injury to vehicle occupants. This issue may be caused by excessive micromovement, leading to fretting corrosion of the door wiring harness terminal contacts.
What will we do?	To identify and correct this defect, authorized Volkswagen dealers will check both front doors to determine if diagnostic trouble (fault) code(s) specific to the affected wiring harness are present. If the fault code(s) are present for a front door, the affected wiring harness will be replaced in that door. Harnesses will be modified with a zip tie to secure them, and a stabilizing compound will be applied to the terminal ends of the affected wiring harness connectors.
	If fault codes are not found, the existing wiring harness will be modified with a zip tie to secure it and a stabilizing compound will be applied to the terminal ends of the affected wiring harness connector(s).
	This work will take about two hours to complete and will be performed for you free of charge. Please keep in mind that your dealer may need additional time for the preparation of the repair, as well as to accommodate their daily workshop schedule.
What should you do?	Please contact your authorized Volkswagen dealer without delay to schedule this recall work.
Precautions you should take	If the recall condition is present in the vehicle, the airbag warning light will illuminate if a malfunction is detected. Other symptoms of a sporadic interruption of the affected electrical connection can be: inadvertently rolling down windows, inadvertent park brake engagement at low speeds (below approximately 3km/h or 1.8 mph), warning regarding faulty door sensor. Customers experiencing any of these conditions are advised to contact an authorized Volkswagen dealer to have their vehicle diagnosed/repaired without delay.
Lease vehicles and address changes	If you are the lessor and registered owner of the vehicle identified in this letter, you shall forward this letter (and any subsequent notice, if applicable) to the lessee within ten (10) days of receipt. If you have changed your address or sold the vehicle identified in this letter, please fill out the enclosed prepaid Owner Reply Card and mail it to us so we can update our records.
Reimbursement of Expenses	If you have previously paid for repairs relating to the condition described in this letter, please refer to the enclosed form that explains how to request reimbursement.
Can we assist you further?	If your authorized Volkswagen dealer fails or is unable to complete this work free of charge within a reasonable time, please contact Customer Relations, Monday through Friday from 8AM to 8PM EST by phone at 1-800-822-8987 or via our "Contact Us" page at <u>www.vw.ca</u> .

We apologize for any inconvenience this matter may cause; however we are taking this action to help ensure your safety and continued satisfaction with your vehicle.

Sincerely,

Volkswagen Customer Protection

The repair information in this document is intended for use only by skilled technicians who have the proper tools, equipment and training to correctly and safely maintain your vehicle. These procedures are not intended to be attempted by "do-it-yourselfers," and you should not assume this document applies to your vehicle, or that your vehicle has the condition described. To determine whether this information applies, contact an authorized Volkswagen dealer. ©2022 Volkswagen Group of America, Inc. and Volkswagen Canada. All Rights Reserved.

Repair Overview

- Check DTC memory for faults related to faulty front door harnesses.
- Modify or replace door harness.

- These repair instructions may differ from the labor operations and labor times listed in ELSA.
- Damages resulting from improper repair or failure to follow these work instructions are the dealer's responsibility and are not eligible for reimbursement under this action.
- This procedure must be read in its entirety prior to performing the repair.
- Due to variations in vehicle equipment and options, the steps/illustrations in this work procedure may not identically match all affected vehicles.
- Diagnosis and repair of pre-existing conditions in the vehicle are not covered under this action.
- When working during extreme temperatures, it is recommended that the vehicle be allowed to acclimate inside the shop to avoid temperature-related component damage/breakage.

Required Tools

Trim Removal Wedge -3409- (or equivalent)		Wedge Set -T10383- (or equivalent)
Small brush (paint brush, for example) (locally sourced shop supply)	Sec. 2	Omega Clip Tool -T40280- (or equivalent)
Pop Rivet Nut Pliers -VAS5072A- (or equivalent) IF DOOR HARNESS REQUIRES REPLACEMENT		Pry lever -80-200- (or equivalent)

Repair Instruction

Section A - Check for Previous Repair

i TIP

If Campaign Completion label is present, no further work is required.

• Enter the VIN in Elsa and proceed to the "Campaign/Action" screen.

i TIP

On the date of repair, print this screen and keep a copy with the repair order.

- Confirm the Campaign/Action is open <arrow 1>. If the status is closed, no further work is required.
- Note the Applicable Criteria ID <arrow 2> for use in determining the correct work to be done and corresponding parts associated.

CRITICAL REPAIR STEP

If multiple software update Campaign/Actions are open, they must be performed in order of the Start date <arrow 3>. The oldest should be performed first.

- All Safety Recalls must be completed prior to completing this campaign.
- Proceed to Section B.

The repair information in this document is intended for use only by skilled technicians who have the proper tools, equipment and training to correctly and safely maintain your vehicle. These procedures are not intended to be attempted by "do-it-yourselfers," and you should not assume this document applies to your vehicle, or that your vehicle has the condition described. To determine whether this information applies, contact an authorized Volkswagen dealer. ©2022 Volkswagen Group of America, Inc. and Volkswagen Canada. All Rights Reserved.

Section B – Door Harness Fault Evaluation

- Perform a GFF diagnostic scan of the vehicle using ODIS.
- If any of the faults listed in the table below are present:
 - The corresponding front door harness must be replaced.
 - Lithium grease will also be applied to the corresponding body side wiring harness.
 - o Refer to Section C for door harness replacement.
- If no related faults are present:
 - o The front door harness (left and/or right) must be modified.
 - Refer to Section D for door harness modification.
- The GFF session should be stopped and saved. Faults will be created during either repair and must be cleared at the end of the repair.
- If a front door harness is replaced, and there are no faults for the opposite side front door harness. The opposite side door harness must still be modified.

Diagnostic Address	DTC	DTC Description	Side

Remove front door trim panel:

INOTE

The removal and installation for the driver side front door trim panel is described. The removal and installation for the front passenger side is similar.

- Pry off the cap <1> with the Trim Removal Wedge -3409-.
- Remove the bolt <2>.

• Turn/release the rotor clip <1> 90° in the <direction of the arrow> (1/4 of a turn) using the open end wrench (10 mm) or Torx T30.

<1> out of the mounts using the Wedge Set <T10383>.

Loosen the clips <2> for the door trim panel

- Remove the door trim panel vertically upward from the window shaft strip. At the same time the crash clip <3> is automatically released.
- Roll the window all the way up after disengaging door panel and before disconnecting the connectors.
- Depending on the vehicle equipment level, disconnect the connectors from the door trim panel.

• Disconnect the cable <1> from the interior door mechanism.

•

Risk of damaging the operating cable by deforming it.

Never sharply bend or kink the operating cable.

Risk of damaging the locking mechanism.

The locking mechanism of all clip connections must be located in the position <1>.

Always turn the clip from the position <2> into the position <1>.

The door trim panel can only be installed when the clip is in the position <1>.

INOTE

The inner door cover does not require removal when replacing the door harness.

If the inner door cover is removed, it must be replaced.

Since replacing the front door harness can be completed without removing the inner door cover, replacing the cover will not be covered under this action.

Remove door speaker:

- Release and disconnect the connector <2>.
- Remove the pop rivets <3> with a suitable drill and a suitable drill bit.
- Remove the speaker <1> from the door.
- Use care so the seal on the speaker is not damaged.

Always remove any shavings resulting from the drilling from the door, otherwise they may cause corrosion damage later.

If the paint on the door frame gets damaged during drilling, touch-up immediately.

Use a wedge <1> from Wedge Set -T10383- to aid in removing the speaker.

Replace door harness:

The removal and installation for the driver side front door harness is described. The removal and installation for the front passenger side is similar.

- Refer to ETKA for the correct door harness part number.
- Pull connector lock <2> upward in direction of <arrow b>.
- Using Wedge -T10383- may assist in releasing the connector lock.
- Pull the harness <3> out from the A-pillar in direction of <arrow c>.

- Work through the speaker opening to disengage the door harness from the door.
- Release the three locking tabs in the <direction of arrows>.

The repair information in this document is intended for use only by skilled technicians who have the proper tools, equipment and training to correctly and safely maintain your vehicle. These procedures are not intended to be attempted by "do-it-yourselfers," and you should not assume this document applies to your vehicle, or that your vehicle has the condition described. To determine whether this information applies, contact an authorized Volkswagen dealer. ©2022 Volkswagen Group of America, Inc. and Volkswagen Canada. All Rights Reserved.

- Pull the door harness away from the door in <direction of arrow>.
- Then pull door harness back into the door.
- Pay very close attention to how the door harness is routed around the lower part of the window regulator. Take photos if necessary.

- Take photos of door harness routing.
- Disconnect connector from Thorax Airbag Crash Sensor <1>.

Pyrotechnical components can deploy unintentionally.

Risk of injury.

Discharge static electricity: briefly touch the door striker.

- Disconnect connectors as needed for:
 - Door control module <2>
 - Window motor <3>
 - Door latch <4>
 - Door handle <5>
- Unclip door harness from the door using Pry lever -80-200- (or equivalent)
- Disengage grommet <6> and remove door harness from the door.
- Install new door harness in the reverse order of removal.
- Ensure all locking connectors are fully seated and locked.
- Ensure grommet <6> is fully seated.

- Secure door harness into the door.
- Ensure locking tabs <arrows> are fully engaged.

- Connect connector <3> in direction of <arrow c>.
- Press connector lock <2> down in direction of <arrow d>.

Reinstall door speaker:

- Installation is the reverse order of removal.
- Secure the pop rivets with the Pop Rivet Nut Pliers -VAS5072A- (or equivalent).

Part Number	Part Description
WHT-005-353	Pop-rivet (x6)

Reinstall door trim panel:

• Installation is the reverse order of removal.

Set window one-touch feature and clear repair related faults:

- Set window one-touch feature.
- Connect ODIS and restore saved ODIS session.
- Clear faults related to having the door harness disconnected.

If the opposite side door harness had no faults, it must be modified.

Proceed to Section D for modification of both body side door harnesses.

Section D – Modifying Door Wiring Harness (body side)

If a door harness was replaced, the corresponding body side harness must still have grease applied to it.

Replacement door harnesses will have a tie wrap already installed. There is no need to replace an existing door harness tie wrap.

If NO fault were stored for both front door harnesses, both front body side door harnesses must be modified.

Disconnect connector:

INOTE

The procedure for the driver side front door harness is described. The procedure for the front passenger side is similar.

- Pull connector lock <2> upward in direction of <arrow b>.
- Using Wedge -T10383- may assist in releasing the connector lock.
- Pull the harness <3> out from the A-pillar in direction of <arrow c>.

Clean connector housings:

- Spray isopropyl alcohol onto the door wiring • harness connector housing and the body side connector housing as shown.
- Allow the cleaner to dry completely. •

Apply lithium grease to connector pins:

Part Number	Part Description
G -055-150-A1	Lithium grease (shop supply)

- A small amount (as shown) should be enough • to coat all of the terminals on one harness.
- Use a clean, small brush, to apply the lithium grease.

INOTE

Use only the lithium grease specified. Alternative grease part numbers or locally sourced lithium grease must NOT be used.

- Apply grease to the terminals in the body side wiring harness connector.
- Ensure both sides of each terminal are covered.
- There is no need to apply grease to the coaxial connection (if equipped).
- Use a small inspection mirror to ensure all terminals are covered.

• Apply grease to the terminals in the door wiring harness connector.

Install tie wrap on door side wiring harness:

INOTE

There is no need to replace an existing door harness tie wrap.

• Pull back protective boot from connector housing using a trim tool.

Risk of damaging wiring

Do not use any sharp tools when pulling back protective boot. Damage to the boot or wiring could occur.

- Apply approx. 10 cm of cloth electrical tape (N -105-920-02, for example) (shop supply)
 <1> around the wires as shown.
- Install new tie wrap <arrow> as shown and cut off excess material.

Part Number	Part Description
N -106-622-01	Tie Wrap

• Reinstall boot onto the connector housing in the reverse order of removal so it is fully seated onto the connector housing.

INOTE

When re-installing the boot, ensure the boot is not twisted.

Line up the markings <arrows> on the boot and the housing.

Reconnect connector:

- Reconnect door harness connector <3> in direction of <arrow c>.
- Press connector lock <2> down in direction of <arrow d>.

Set window one-touch feature and clear repair related faults:

- Set window one-touch feature.
- Connect ODIS and restore saved ODIS session.
- Clear faults related to having the door harness disconnected.

Proceed to Section E

Install Campaign Completion Label

• Fill out and affix Campaign Completion Label, part number CAMP 010 000, next to the vehicle emission control information label.

Ensure Campaign Completion Label does not cover any existing label(s).

Proceed to Section F

Section F - Parts Return/Disposal

Properly store (retain), destroy or dispose of removed parts in accordance with all state/province and local requirements, unless otherwise indicated and/or requested through the Warranty Parts Portal (WPP) for U.S. and the Part Destruction and Core Disposition Report for Canada.
