**KZ-2022-03 Repair Instructions**

It has come to our attention that we may have installed tags on your camper that have incorrect tire ratings on them. The current tag on the unit likely shows an "E" rating for the tires, and your tires are actually "D" rating. This results in an incorrect inflation rating on the sticker. The actual inflation for your tires should be 65PSI, not 80PSI as your current tag reads. Please remove and discard the incorrect tags and install the tags included with this letter.

Thank you for your time.
