Dealer Service Instructions for:

Safety Recall ZC5 / NHTSA 22V-947

Incorrect Rearview Camera

Remedy Available

2022 (VF) Ram ProMaster

NOTE: This recall applies only to the above vehicles equipped with a Rear Back-up Camera Kit (sales code XA3).

IMPORTANT: Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Dealers should also consider this requirement to apply to used vehicle inventory and should perform this recall on vehicles in for service. Involved vehicles can be determined by using the VIP inquiry process.

Subject

About 40 of the above vehicles may be built with an analog rearview camera in the accessory bag instead of a digital rearview camera. If the rearview camera image is unavailable, the driver may be unaware of a person or object behind them, which may increase the risk of a crash or injury without prior warning.

The condition above fails to conform to the requirements of Federal Motor Vehicle Safety Standard (FMVSS) No. 571.111 – REARVIEW MIRRORS which states that "...when the vehicle's direction selector is placed in reverse...the rear visibility system must default to the rearview image...".

Repair

Inspect the vehicle for a rearview camera image in the radio. If present, close the recall.

If the cab/chassis has not yet been through the upfitting process, provide the upfitter with a new digital camera.
