Flex

Holiday Rambler:

Invicta

Vacationer

Navigator

Admiral

Eclipse

MODEL(S) AFFECTED:

All

SUBJECT:

Possible leaking service valve on propane tank

KEYWORDS:

Propane Tank Service Valve Leak

Issued:
February 2023

© 2023 REV Recreation Group, Inc.

The purpose of this Recall Service Bulletin is to inform REV Recreation Group dealers of the need to inspect, leak test, and if necessary, replace the service valve on propane tanks. Products within model year 2021-2023 Fleetwood brands Bounder, Fortis, Southwind, Pace Arrow, Flair, and Flex. Holiday Rambler brands Invicta, Vacationer, Navigator, Admiral, and Eclipse Class A Gas and Diesel motorhomes. A list of affected motorhome serial numbers appear at the end of this Bulletin.

CONDITION: On motorhomes affected by this recall campaign, the propane tank may have a service valve with the incorrect depth of the threads on the POL (Prest-O Lite) outlet as identified by Model Numbers 901C3 and 901C5 and Date Codes between 02X21 (February 2021) and 02X22 (February 2022). If the thread depth of the service valve is incorrect, a leak in an enclosed area in the presence of an ignition source could lead to a fire, and in some circumstances, tank ruptures.

ATTENTION SERVICE, WARRANTY AND PARTS MANAGERS:

ALL APPROVALS, PARTS ORDERS and CLAIM PAYMENTS, must go through REV RV DEALER TECHNICAL SUPPORT AT (800) 816-9825 and REV PARTS AT (800) 509-3417. READ THE ENTIRE BULLETIN CAREFULLY BEFORE ASSIGNING THE FOLLOWING INSPECTION/REPAIR TO A **TECH WITH PROPER LP TRAINING.**

Administrative information is located on Page 6

 **WARNING: FAILURE TO FOLLOW THESE STEPS TO REPAIR ANY TANK THAT CONTAINS A LEAKING SERVICE VALVE COULD RESULT IN A FIRE OR EXPLOSION, SERIOUS PERSONAL INJURY, AND/OR PROPERTY DAMAGE**

 **WARNING: ATTEMPTING TO MAKE REPAIRS WITHOUT THE PROPER TRAINING COULD RESULT IN A FIRE OR EXPLOSION, SERIOUS PERSONAL INJURY, AND/OR PROPERTY DAMAGE**

PHOTOS WILL BE REQUIRED OF THE VALVE BODY AND IF THE SERVICE VALVE IS LEAKING AND REQUIRES REPLACEMENT.

This bulletin is supplied for technical information only and is not an authorization for repairs.

Federal law (section 154 of the national traffic and motor vehicle safety act of 1966) requires that if you have received a notice of recall or failure to comply from REV Recreation Group or any component Manufacturer, you must repair or otherwise correct the defects on vehicles remaining in your inventory, according to the notification, before selling or leasing the vehicles. Any vehicle lessor receiving this recall notice must forward a copy of the notice to the lessee within ten days.

It is impossible to know, evaluate and advise the service trade of all conceivable ways in which service might be done or of the possible hazardous consequences of each way. Accordingly, anyone who uses a service procedure or tool must first assure that neither personal safety nor vehicle safety will be jeopardized by the selected service methods.

CAUTION

Park the motorhome on dry, level solid surface. Chock the front wheels to prevent movement while work is being performed. Set the parking brake. Turn off the key and remove it from the ignition. Maintain control of the keys until all work is completed.

Note: Read this entire Bulletin before proceeding with repairs.

Follow the steps in the procedure below to inspect, leak test and if necessary, replace the service valve on the propane tank. Not all sections will apply to every motorhome.

The following is a list of scenarios: (Pictures will be required for each scenario)

- **VISUAL INSPECTION: Determine if the Model Number on the service valve is within scope. Section 1 Steps 1-3**
- **VISUAL INSPECTION: If the Model Number is within scope, determine if the Date Code is within scope. Section 2 Steps 4-5**
- **LEAK TEST: Once the Model Number and Date Code are found within scope, leak test all fittings in this area. On tanks with LP: Section 3 Step 6. On tanks without LP: Section 5 Steps 18-21.**
- **REPLACEMENT AND REPEAT LEAK TEST: If the Model number and Date Code are within scope, and the service valve is showing signs of leaking. On tanks with LP: Section 4 Steps 7-17. On tanks without LP: Section 6 Step 21.**

REMINDER: ALWAYS BEGIN WORK WHILE THINKING OF SAFETY.

SECTION 1

1. Open the propane tank compartment and locate the service valve on the propane tank (See Figure 1).
2. Once the service valve has been located on the propane tank, check the Model Number. The affected Model Numbers are **901C3** and **901C5** only. The Model Number will be located on the flat surface on the bottom side of the service valve. (See Figure 1 for location)

Note: A mirror may be required to see the Model Number.

FIGURE 1

The Model Number will be located on the flat surface on the bottom side of the service valve.

3. Once the Model Number has been located and identified determine;
 - A. If it **does not** match the affected Model Numbers, **TAKE A PHOTO OF THE MODEL NUMBER**, on the valve and submit for authorization. **STOP**: No further action is required. **Submit for Authorization Using Flat Rate Code 6310 11 Inspected/Not Defective**
 - B. If the valve **does** match the affected Model Numbers 901C3 or 901C5, proceed to Section 2 step 4.

SECTION 2

Once the Model Number is determined to be in scope, you must validate the Date Code on the opposite side or the underside of the valve.

HOW TO DECIPHER DATE CODE:

Digit-Letter-Digit Date Code	Letter in date code is the week	Second 2 digits in date code are the year
First digit in date code is the month	A - 1st Week	18 - 2018
1 - January	B - 2nd Week	19 - 2019
2 - February	C - 3rd Week	20 - 2020
3 - March	D - 4th Week	21 - 2021
4 - April		22 - 2022
5 - May		
6 - June		
7 - July		
8 - August		
9 - September		
10 - October		
11 - November		
12 - December		

Example: 6A21 = First week of June 2021
*Products with the new "See the Difference" laser engraving display the full four-digit year. Example: 6A2021

- Refer to the table above. Check the manufacturing Date Code. The affected service valves have a manufacturing Date Code between **02X21** (February 2021) and **02X22** (February 2022). The Date Code will be located on the flat surface on the top side of the service valve. (See Figure 2 for location). (For example, on how to decipher the Date Code see table above).

FIGURE 2

The Date Code will be located on the flat surface on the top side of the service valve.

- Once the Date Code has been located and identified determine;
 - If it **does not** fall within the affected Date Codes, **TAKE A PHOTO OF THE DATE CODE**, and submit for authorization. **STOP**: No further action is required.
Submit For Authorization Using Flat Rate Code 6310 11 Inspected/Not Defective
 - If it **does** fall within the affected Date Codes, proceed with the following steps depending on whether the tank has LP (See step 6) or is empty (See step 18).

SECTION 3

IF THERE IS PROPANE PRESSURE IN THE LP TANK:

6. Ensure the service valve is open (and the propane system is pressurized), apply a leak detection solution (SHERLOCK 5 SECOND LEAK DETECTOR UNDILUTED IS RECOMMENDED) at the service valve outlet connection and the POL connector. (See Figure 3)

*While performing solution test, check other connections in the area as a precaution.

FIGURE 3

Valve outlet connection
(POL Threads)

- A. If **no leaks are detected**, STOP: No further action is required.
Submit For Authorization Using Flat Rate Code 6310 11 Inspected/Not Defective & 0401 23 Propane System Leak Test
- B. If a **leak is detected**, try tightening the connection, and re-apply the leak detection solution. If tightening the connection does not stop the leak, **(PHOTOS WILL BE REQUIRED SHOWING THE LEAK)**, close the service valve and contact **REV RV PARTS DEPT AT (800) 509-3417 AND ORDER PART #10108779**. Then proceed to step 7.

SECTION 4

REPAIR PROCEDURE:

NOTE: THIS MAY BE USED IN THE SECTION 5 REPAIR PROCEDURE

WHAT TO DO IF:

A LEAK HAS BEEN DETECTED WITH PROPANE PRESSURE IN THE TANK (LP IN TANK)

7. Once a leak has been verified, **ensure that all propane is purged from the tank and the tank pressure is 0 psi. FOLLOW RVIA AND LP STANDARDS FOR REMOVING LIQUID PROPANE.**
8. Once all propane has been properly purged, and the tank pressure is 0 psi, replace the leaking service valve.
9. The new service valve will have thread sealant pre-applied and can be inserted into the tank and turned two times around by hand. An additional 3 ½ to 4 ½ turns may be needed to allow for proper orientation of the valve.
10. Once the new service valve is installed, open the valve, and purge any trapped air from the tank.
11. Reconnect the POL connector to the service valve outlet.
12. **Close** the service valve and install an air fitting on the ¼" NPT threads of the POL connector. (See Figure 5)

13. Apply 50-100 psi air pressure back towards the outlet of the service valve.
14. Use a leak detection solution to determine if the connection is leak tight between the POL connector and the service valve.
15. If a leak is detected, tighten the connection, and re-apply the leak detection solution.
16. If no leaks are detected, reconnect the POL connector to the LP regulator. Ensure the LP regulator is back to the original orientation.
17. The LP tank should be ready for use. **STOP:** No further action is required.
Submit For Authorization Using Flat Rate Code 6310 12 Inspected/Tested/Replaced Valve/Retest

SECTION 5

IN THE RARE EVENT THERE IS NO PROPANE PRESSURE IN THE LP TANK:

18. Close the service valve and unhook the POL connector from the LP regulator, install an air fitting on the ¼" NPT threads of the POL connector. (See Figure 5)
19. Make sure the service valve is **closed**. Apply 50-100 psi air pressure back towards the outlet of the valve.
20. Use a leak detection solution to determine if the connection is leaking between the POL connector and the service valve.
 - A. If **no leaks are detected**, reconnect the POL connector to the LP regulator. Add a small amount of LP to the tank and leak test again. **STOP:** No further action is required. **Submit For Authorization: Use Flat Rate Code 6310 11 Inspected/Not Defective & 0401-23 Propane System Leak Test**
 - B. If a **leak is detected**, try tightening the connection between the POL connector and the service valve. Apply 50-100 psi air pressure and use a leak detection solution. If tightening the connection does not stop the leak, **(PHOTOS WILL BE REQUIRED SHOWING THE LEAK)**, close the service valve and contact **REV RV PARTS DEPT AT (800) 509-3417 AND ORDER PART #10108779.**
 - C. Proceed to Section 4 Steps 8-17 for repair procedure.

RECALL REPLACEMENT PART - REV RV PARTS DEPT AT (800) 509-3417

QTY 1: 10108779 Service Valve – **REQUIRED TO BE ORDERED FROM REV RV PARTS**
(Return part is not required, but photos are required)

WARRANTY LABOR ALLOWANCE: RECALL 221222REV Service Valve Use Flat Rate Codes:

SECTION 1 & 2 (Visual Inspection) **6310 11** - Inspected/Not Defective 0.25 hr. Total (Photos are required of the model/date on valve) *Note: If sections 1 and 2 applies and no leak test was required only submit the code listed above. Don't combine other codes.

The following sections already include the inspection times outlined above. Chose the repair section and labor codes below that are associated with the repairs preformed.

SECTION 3 (Inspection, Tested, No Leaks) **6310 11** – Inspected/Not Defective 0.25 hr. }
0401 23 – Propane System Leak Test 0.25 hr. } 0.50 hr.

SECTION 4 (Inspection/Test/Replace Valve/Retest) **6310 12** – Inspected/Defective/Repaired 1.25 hr.

SECTION 5 (Inspection/Tested No Leaks) **6310 11** – Inspected/Not Defective 0.25 hr. }
0401 23 – Propane System Leak Test 0.25 hr. } 0.50 hr.

If circumstances arise with this repair that requires additional attention, please make sure to include that information on your warranty request.
