Our most recent records indicate that the Mercedes-Benz vehicle registered in your name is affected by the subject recall, and still has not been repaired. We want to stress the importance of making an appointment at your preferred authorized Mercedes-Benz dealership as soon as possible for this FREE recall repair. The original communication for this recall was sent to the owner who was on file as of March 2022.

Mercedes-Benz AG ("MBAG"), the manufacturer of Mercedes-Benz vehicles, has determined that a defect which relates to motor vehicle safety exists in certain Model Year ("MY") 2021 Mercedes-AMG GT Black Series vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

#### What is the issue?

In certain Model Year ("MY") 2021 Mercedes-AMG GT Black Series vehicles, the length of the wiring harness for the front wheel speed sensors might not meet current production specifications. In certain driving maneuvers, vehicle dynamic control system functions, such as stability and traction control, and anti-lock brakes, might be impaired, which could increase the risk of a crash.

#### What will your Mercedes-Benz Dealership do?

An authorized Mercedes-Benz dealership will replace the front speed sensor wiring harnesses on the affected vehicles. **This vehicle repair will be provided at no cost to you.** While the repair time can be less than 2 hours, your dealership can provide you with a better estimate of the overall time for this visit. As a matter of normal service process, an authorized Mercedes-Benz dealership will also check for other repair measures that might be applicable to your vehicle, which may increase the required working time. You will not be charged for other services or repairs unless so requested.
