Dear «POLKNAME»:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Our records indicate
YOUR UNIT HAS NOT BEEN
REMEDIED.
Please DO NOT ignore this notice!

Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2022 Cougar Fifth Wheels and Travel Trailers. As a result, Keystone RV is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for
this recall***

It has been decided that the vehicles in the recall population may have Load Range “D” (2540 lbs) tires installed rather than Load Range “E” (2860 lbs) tires. Under certain conditions during travel, an overloaded tire can fail and lead to an increased risk of vehicle crash.

***What we
will do***

Keystone representatives have been in contact with the staff at your selling dealership regarding this situation. The remedy is to inspect tires and replace the improperly installed load range “D” (2540) tires with proper load range “E” (2860) tires (686233 - Tire - Trailer King RST - ST225/75R15 E - 2860# - 80PSI - OD-28.3 - SW-8.8 - Tire Only). The service and parts required for this corrective action will be provided at no charge to you.

***What we
need you to
do***

Remove personal items (weight) in the vehicle before taking it to a dealer to remedy. As soon as possible, please make an appointment to have your RV serviced by your dealership. The labor time to perform this correction is approximately 2 ½ hours. Please ask your dealer if you wish to know how much additional time will be needed to schedule and process your RV for this repair.

**BE ADVISED –
Damage caused by failure to have the
recall remedy completed will be the
responsibility of the owner.**
