Dear «POLKNAME»:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Our records indicate
YOUR UNIT HAS NOT BEEN
REMEDIED.
Please DO NOT ignore this notice!

Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2023 Aspen Trail, Coleman, Kodiak Travel Trailers. As a result, Keystone RV is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for
this recall***

It has been decided that the vehicles in the recall population have an electric stabilizer jack switch that is not waterproof from the back side of the switch. Under certain conditions during travel, the back side of the extend/retract switch for the electric stabilizer jacks can short out causing the jacks to extend during travel, leading to an increased risk of personal injury, and or vehicle crash.

***What we
will do***

Keystone representatives have been in contact with the staff at your selling dealership regarding this situation. The remedy is to replace the existing jack switch (KRV# 700835) with an IP 66 waterproof switch on front and back sides. The service and parts required for this corrective action will be provided at no charge to you.

***What we
need you to
do***

Disconnect the center wire and protect the connector with a piece of tape on the back of the switch if driving in the rain. As soon as possible, please make an appointment to have your RV serviced by your dealership. The labor time to perform this correction is approximately 1 hour. Please ask your dealer if you wish to know how much additional time will be needed to schedule and process your RV for this repair.

**BE ADVISED –
Damage caused by failure to have the
recall remedy completed will be the
responsibility of the owner.**
