***For Immediate Release***

**Statement by American Honda Regarding Fuel Tank Recall: 2020 Honda CR-V**

- **212 vehicles are affected, only in the United States**
- **Fuel tanks will be replaced for free**
- **No reported crashes or injuries related to this issue**

TORRANCE, Calif. – June 3, 2022 – In the United States, American Honda will voluntarily recall 212 Honda CR-V vehicles from the 2020 model year to replace their fuel tanks, for free. An internal component of the fuel tank may break loose inside the tank and block the float mechanism that signals fuel level to the meter, incorrectly indicating the amount of fuel in the tank. This defect may lead to a vehicle unexpectedly running out of fuel and stalling while driving, increasing the risk of a crash. No crashes or injuries have been reported in relation to this issue.

Honda is announcing this recall to encourage each owner of an affected vehicle to take it to an authorized dealer as soon as they receive notification of this recall from Honda. Mailed notification to owners will begin in early-July 2022. Owners can also determine if their specific vehicles are included in the recall by visiting [www.recalls.honda.com](http://www.recalls.honda.com) or by calling (888) 234-2138.
