Dear [Mr. John Doe],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

Ferrari has decided that a defect which relates to motor vehicle safety exists in certain Model Year 2020 - 2022 Ferrari F8 vehicles. The vehicles involved are equipped with a brake reservoir fluid cap that may not vent properly. This could potentially result in the leaking of brake fluid, which may lead to a partial or a total loss of braking capability, increasing the risk of a crash. We want to assure you that your safety is our priority, and we are committed to correcting this condition in your vehicle if it exists.

Our records show that you are the owner of a vehicle affected by this recall.

IMPORTANT

Ferrari will repair your vehicle free of charge. The repair consists of replacing the brake fluid reservoir cap and updating the software in your vehicle to provide for a different warning message if your vehicle should lose sufficient brake fluid. **The replacement part is not yet available**; we will contact you again when the replacement part is in dealer stock. The time needed for the repair and software update is estimated to be approximately 1 hour.
