Details of the Recall

The Tire Pressure Monitor System (TPMS) sensors on your vehicle may prematurely discharge its battery, making the TPMS sensor inoperative. If the TPMS light illuminates because the battery in the sensor prematurely discharges, it could mask an actual low tire pressure condition, possibly resulting in tire failure, which can cause a vehicle crash without prior warning.

FCA US will repair your vehicle free of charge (parts and labor). To do this, your dealer will inspect all the TPMS sensors and replace any if needed. The estimated repair time is about 2 hours. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience.

How do I schedule my [FREE](#) repair?

- ◆ Simply contact your Chrysler, Jeep®, Dodge or RAM dealer right away to schedule a service appointment.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
