

AXLE WARRANTY

ADDITIONAL INFORMATION

Only a small percentage of potential trailers will be affected.

You can inspect the axles of your trailer to confirm if they will or will not qualify to be replaced.

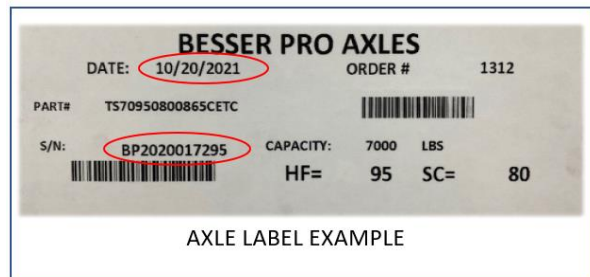

If axles need to be replaced, please see below to schedule an appointment.

HOW TO INSPECT YOUR AXLES

Information on axles can be found on the axle itself. Each axle has a unique serial number and date of manufacture.

Only 7k straight axles manufactured between **October 7, 2021, and October 25, 2021**, are affected. The serial number range on these axles is **2020015994 through 2020017408**. This information can be found on the axle label, which is located on the main beam of the axle. Please see the attached picture to note where to find either the date or serial number of the axle. If you have any difficulty identifying the axle, such as a damaged identification, please contact Delco for assistance.

WHAT TO DO TO IF YOUR AXLES QUALIFY FOR REPLACEMENT

WHAT IF I AM NOT ABLE TO INSPECT THE AXLES

You may contact your local dealer to set up an appointment to have these axles inspected free of charge. You can also call Delco Trailers at 903-405-3155 and have us walk you through the inspection process. If you are unsure if your axles qualify, you can send pictures of the axle label to info@delcotrailers.com and have our team review them with you.
