		What is the safety concern for Safety Recall 24iL?	Vehicles included in this recall are equipped with an all-wheel drive powertrain and have a specific software version installed in the engine control unit that, under specific conditions (high ambient temperatures, high engine load, A/C on), may lead to a stalling condition when coming to a stop. The engine can be immediately restarted manually. An engine that stalls while coming to a stop (20 mph/32 km/h) may increase the risk of a crash.								
		What is the repair for the Safety Recall 24iL?	To address this potential issue, your authorized Volkswagen dealer will perform an ECU software update.								
		When will the repair for Safety Recall 24iL be available?	Repairs for this recall have begun. Please contact your authorized Volkswagen dealer without delay to schedule this recall repair. To set up an appointment online, please visit <a href="http://www.vw.com/find-a-dealer">www.vw.com/find-a-dealer</a> .
