### Details of the Recall

The rear brake hose on your vehicle may have an out of specification orifice diameter. A brake hose that does not meet constriction requirements may be more susceptible to hose assembly rupture. A ruptured brake hose could result in reduced braking performance, which may increase the risk of a crash without prior warning.

FCA US will repair your vehicle free of charge (parts and labor). To do this, your dealer will replace the rear brake hoses. The estimated repair time is one hour. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.
