What your recall means and how will it be repaired.

General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2020–2023 model year Chevrolet Bolt EV vehicles. In certain crashes that cause the front seatbelt pretensioners to deploy, the exhaust from the deployed pretensioner may ignite fibers in the floor carpet near the B-pillar. Following a crash that causes the seatbelt pretensioner to deploy, a fire may develop in the area near the B-pillar, which may increase the risk of injury.

Sincerely,

Regina Carto
