Chronology :

On July 26, 2023, DTNA received a copy of the Defect Information Report that Dana filed a recall for a certain lot of potentially defective drive shafts after completing an analysis of a single drive shaft failure in April of 2023. After reviewing preliminary information furnished from Dana, DTNA was able to match a suspect population range. On July 31, 2023, DTNA decided to file a vehicle companion recall to support Dana's recall for this issue. DTNA is not aware of any accidents or injuries related to this issue. DTNA anticipates the recall population may be adjusted after receiving additional information from Dana cross-referencing part serial number to truck VINs. DTNA found 1 total warranty claims related to this issue. On August 30, 2023, DTNA was provided with updated population information from Dana. Dana's records indicated the suspect parts were shipped to Grimaldi, a 3rd party sequencer, who assigns a specific, serialized number part to a truck VIN. Based on this updated population information from Dana, DTNA was able to refine the vehicle population following a comprehensive review of the documentation of suspect serialized driveshafts shipped from Dana to Grimaldi. On November 2, 2023 DTNA is providing revised planned final owner and dealer notification dates.

Description of Remedy :

Description of Remedy Program : Affected vehicle owners will receive a replacement drive shaft. DTNA is currently developing the repair strategy. Repairs will be performed free of charge by Daimler Truck North America authorized service facilities. Details of the reimbursement plan will be included in the owner's notification letter. Owners are directed to seek reimbursement through authorized dealers.

How Remedy Component Differs from Recalled Component : NR

Identify How/When Recall Condition was Corrected in Production : Based on information provided by the supplier, the issue was caused by a sub-supplier's use of nonconforming material, which has since been corrected in production.
