☐ Not sequential**Description of Noncompliance :**

Description of the Noncompliance : According to Dexter's Recall ID 23E070, the tires may have a sidewall that could delaminate or have bubbling after inflation.

FMVSS 1 : 119 - New pneumatic tires- other than passenger cars

FMVSS 2 : NR

Description of the Safety Risk : According to Dexter's recall ID 23E070, for certain Goodride ST 200 tires, the potential non-compliance issue may lead to a gradual loss of tire pressure resulting in loss of mobility of a trailer-in-tow, which increases risk of a crash.

Address : PO Box 250

Elkhart Indiana 46515

Country : United States

Chronology :

We received Dexter's official notification of non compliance on December 11, 2023. PJ Trailers decided to file its recall on December 13, 2023. We identified when the recalled population of tires arrived in inventory and when we contained/quarantined the inventory and pulled defective tires from the production process.

Description of Remedy :

Description of Remedy Program : All Goodride ST200 ST235/80R16 LRE tires will be inspected and replaced if found to be noncompliant. For replacement of recalled tires, Dexter will be contacted for replacement. All recall tires will be permanently altered to prevent them from being used on vehicles. There is no cost to owners for this recall. Replacement of the tires will take approximately .75 hours per tire. PJ Trailers would like to incorporate its General Plan for Reimbursement of Pre-Notification Remedy Costs submitted to NHTSA for reimbursing owners, purchasers and dealers.

How Remedy Component Differs from Recalled Component : The specific TIN and manufactured date code will be provided, allowing customers to clearly identify any tires in the defective population.

Identify How/When Recall Condition was Corrected in Production : It was remedied on 9/26/2023 via complete audit and containment.
