## **New Safety Recall Advanced Communication – 14A**

FCA US LLC (FCA US) has announced a safety recall on certain 2021 through 2023 Model Year (DT) Ram 1500 and 2023 Model Year (DJ) 2500 vehicles equipped with Trailer Reverse Steering Control.

### **REASON FOR THIS SAFETY RECALL**

Some of the above vehicles may be equipped with a Trailer Reverse Steering Control Module (TRSCM) that prevents the rearview image from displaying under certain conditions.

The vehicle operator will notice that the rearview image is not displayed if attempting to reference the image while backing. If this warning is not heeded, backing without verifying it is safe to do so could lead to an increased risk of injury to people outside the vehicle.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall on all affected vehicles to update the TRSCM software. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 1st Quarter of 2023.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
