Recall Campaign Initial Notification			May 5, 2023
Campaign No. :	NHTSA ID	Campaign Desc. :	Update Battery Management System Software
TBD	23V309	23P2197602	
<p>This is to notify you of the new Recall Campaign to update the Battery Management System software on certain 3,823 Model Year (“MY”) 2022-2023 S-Class, EQE, EQS SUV, and EQS (223, 295, 296, 297 platform) vehicles. The recall campaign will be visible on the www.NHTSA.gov website and may generate questions from customers. Affected VINs will be flagged in VMI as “PENDING” on May 5, 2023.</p>			
Background			
Issue	Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz vehicles, has determined that on certain Model Year (“MY”) 2022-2023 S-Class (223 platform), EQE (295 platform), EQS SUV (296 platform) and EQS (297 platform) vehicles, the monitoring function of the high-voltage battery might be impaired over time. In certain circumstances, a warning alerting the driver of a battery malfunction might not activate in the event of a fault. In such instances, the warning would not comply with a requirement of FMVSS 305 (Electric-powered vehicles).		
What We’re Doing	MBUSA will conduct a voluntary recall. An authorized Mercedes-Benz dealership will update the software for the Battery Management System on the affected vehicles.
