## Description

This recall covers certain Cummins L9 engines equipped with a remote Stage 2 fuel filter (Option Number FF90942), which includes two pressurized fuel hoses. The recall consists of the entire population of the engines built between the identified production dates that were equipped with this remote fuel filter option. The subject engines were sold to various OEMs for installation on trucks and recreational vehicles. The remote fuel filter hoses installed on some of the subject engines may have been damaged during engine production, possibly resulting in a fuel hose becoming disconnected or leaking fuel. A fuel hose that becomes disconnected will result in an engine stall, increasing the risk of a crash. A fuel leak in the presence of an ignition source may increase the risk of a fire.

**Note :** This field action provides retroactive coverage for repairs made in anticipation of and prior to the release of this publication.

## Action

In order to qualify for repair under this field action, an engine:

1. will be covered Regardless of coverage status, and
2. **must** show as OPEN on QuickServe® Online for this field action.

**Note** : The ESN list is attached for reference.

After verifying that the engine meets the above requirements, perform the following actions:

1. Remove and replace the remote mount fuel hoses with the new and improved hose.
2. Please refer to TSB # 210184 and Service Procedure 006-024 Fuel Supply Lines in the appropriate service manual.

## Material Disposition

---
