## **New Safety Recall Advanced Communication – 84A**

FCA US LLC (FCA US) has announced a safety recall on certain 2023 Model Year (JL) Jeep Wrangler vehicles equipped with a 33-inch diameter tire.

### **REASON FOR THIS SAFETY RECALL**

The spare tire carrier on some of the above vehicles may have been built with an incorrect Center High Mount Stop Lamp (CHMSL) bracket assembly. A CHMSL that is partially obstructed may not have adequate conspicuity to other drivers to indicate the intention to slow or stop, which can cause a crash without prior warning.

Federal Motor Vehicle Safety Standard (FMVSS) No. 571.108 S6.1.3.1 requires that "Each lamp...must be securely mounted...and in a location where it complies with all applicable photometric requirements in S7.9.13 Photometry. Each high-mounted stop lamp must be designed to conform to the photometry requirements of Table XV...". Subject vehicles do not meet these photometry requirements.

### **SERVICE ACTION**

FCA US will conduct a voluntary safety recall on all affected vehicles to replace the spare tire carrier assembly. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 3rd Quarter of 2023

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
