Issue: A small number of affected vehicles may be equipped with a European-specification brake fluid reservoir cap instead of the one required for the United States market. If the incorrect cap is present and the owner does not understand the markings, it is possible that the incorrect fluid could be used in the reservoir. Incorrect fluid can make the brake system perform improperly, causing the risk of a crash.

- Repair:**
- REPAIR AVAILABLE – September 14, 2023 - Inspect and, if necessary, replace the brake fluid reservoir cap
 - See ELSA/ServiceNet for complete repair & claiming instructions
 - Check daily campaign open inventory report or OMD for affected vehicles in inventory
 - Repair every affected inventory vehicle before delivery to consumers.

Parts Department: There will be no parts allocation. Please reference the Repair Projection Tool in the campaign circular to view your potential VIN population
