

New Safety Recall Advanced Communication – 94A

FCA US LLC (FCA US) has announced a safety recall on certain 2023 Model Year (WD) Dodge Durango Pursuit vehicles equipped with an IP Mounted Electric Shifter (sales code XE2).

VINs identified as being involved in this campaign are currently live and searchable.
Stop sale is in effect for the above-identified vehicles.

Vehicles impacted by a stop sale are eligible for reimbursement allowance through the Recall Floorplan Reimbursement Policy (RFPRP), which can be requested upon recall claim submission.

IMPORTANT: Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$21,000 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with shifter assemblies that may experience an interference with the shifter boot when placed in the drive position.

A shifter with a shifter boot interference may not be able to maintain the drive position. A shifter that is not fully seated in the drive position may unexpectedly lose motive power, which can cause a vehicle crash without prior warning.

SERVICE ACTION

FCA US will conduct a voluntary safety recall on all affected vehicles to replace the IP mounted shifter boot. The remedy for this condition is not currently available. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 4th Quarter of 2023.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
