*A4. Due to a supplier manufacturing error, one of the joint connection points of the right front lower control arm (LCA) to the vehicle's crossmember may have been improperly welded. If partial separation occurs, the vehicle's front toe angle may change impacting the vehicle's steering, thereby increasing the risk of a crash.*

**Q7. What should vehicle owners do when they receive the notification?**

*A7. Upon receipt of the letter, owners are to contact their authorized Kia dealer to arrange to have the recall campaign performed on their vehicle free of charge at no cost to them. Customers are also instructed NOT to drive their vehicles, and have their vehicles towed to an authorized Kia Dealer to have this recall performed.*

**Q8. Where were these vehicles produced?**
