Re: Incorrect Vin on Certification Label

«TO»

This notice is being sent in accordance with the requirements of the National Traffic Motor Vehicle Safety Act.

Great Dane LLC has decided that a defect, which relates to motor vehicle safety, exists in certain model year 2023 Great Dane Champion trailers were produced with incorrect VINs on their certification decals. The section of the VIN that denotes the length of the trailer is incorrect, which also caused the check digit to be incorrect. As such, these trailers fail to comply with the requirements of 49 CFR Part 567, "Certification."

This is a non-compliance issue; the certification plates were printed with incorrect VINs. The length indicator and check digit are incorrect which may lead to law enforcement believing that the VIN had been altered or that the trailer was stolen. Additionally, an owner that references an incorrect VIN label may not recognize their trailer is involved in a safety recall, and may not have the recall remedy performed, which could increase the risk of injury, fire, or a crash.

Great Dane LLC has shipped new certification decals, free of charge. The new certification decals should be installed over and completely covering the original certification decals. If you have any questions about installing the replacement decals please contact Great Dane Customer Service at (877) 369-3493.

Federal regulations require that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.

If you conclude that Great Dane LLC has not enabled you to remedy this condition without charge and/or in a reasonable time, a complaint may be submitted to the:
