Dear Valued BraunAbility Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

BraunAbility has decided that a defect that relates to motor vehicle safety may exist in certain Accessory Child Seat Weldments manufactured October 24, 2020 – January 4, 2023. Component TAS-01223, child seat weldment, is included in optional kits VSS-K-2603 “VSS-2600 (LS) CHILD LATCH KIT” and VSS-K-2604 “VSS-2600 (RS) CHILD LATCH KIT” which are accessories to the BraunAbility Turny Evo Seat Model VSS-2602. Component TAS-01223, child seat weldment, may have been manufactured with welds that do not meet the engineering design intent. Improperly welded lower child restraint anchors may detach during a crash, increasing the risk of injury to the seat occupant.

The remedy is to schedule an appointment with your local BraunAbility dealer for inspection of the child restraint anchors on the Turny Evo seat. If the inspection finds insufficient welds, the child restraint anchors will be replaced. The repair can be scheduled starting February 27, 2023 and will take approximately 30 minutes for inspection and one hour and 30 minutes for inspection and repair. The costs associated with the repair and inspection will be covered by BraunAbility.

If you had this remedy performed on your BraunAbility Turny Evo Seat prior to receiving this letter, you may be eligible to receive reimbursement for the cost of the remedy.
