Dear Mercedes-Benz Owner:

This notice is being sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain model year 2019–2021 G-Class vehicles. Our records indicate that your vehicle is included in the affected population.

What is the issue?

The front axle wiring harness may chafe against an oil cooler and become damaged, which might result in the anti-lock braking system (“ABS”) and electronic stability control (“ESC”) being impaired. An impaired ABS or ESC could increase the risk of a crash. When this failure occurs, the driver would be made aware through an indicator lamp or warning message in the instrument cluster.

What will your Mercedes-Benz Dealership do?

An authorized Mercedes-Benz dealership will inspect and either install a protective sleeve or replace the front axle wiring harness, if necessary. **This vehicle repair will be provided at no cost to you.** While the repair time can take between to 1-5 hours, your dealership can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes-Benz dealership will also check for other repair measures which might be applicable to your vehicle and this may increase the required working time. You will not be charged for other service or repairs unless so requested.
