REASON FOR THIS RECALL

A shorted switch or fuse may cause the circuit to generate excessive heat which can result in an increased risk of a fire.

DEFECT REMEDY

The repair will involve replacing the brake pressure switch assembly and any wire harness found with brake fluid at the brake pressure switch connector or the associated fuse. Dealers have parts and instructions to repair your vehicle. The repair will be performed free of charge and take approximately 45 minutes to 1 hour 15 minutes to complete.
