Dear Mercedes-Benz Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain model year (“MY”) 2022–2023 C-Class vehicles. Our records indicate that your vehicle is included in the affected population.

What is the issue?

The length of the transmission wiring harness may be incorrect. As a result, the transmission wiring harness could chafe on the front drive shaft, which could lead to a loss of propulsion and increase the risk of a crash. If the failure occurs, the driver would be made aware through a warning message (e.g. “Transmission Malfunction Stop”, “Drive Malfunction Stop Restart Vehicle”, “Drive Malfunction Stop Contact Dealer”, or “Service Required Do Not Change Transmission Position”) in the instrument cluster.

What will your Mercedes-Benz Dealer do?

An authorized Mercedes-Benz dealer will inspect the transmission wiring harness routing on the affected vehicles and repair it, if necessary. **This vehicle repair will be provided at no cost to you.** While the repair time can be less than **2.5 hours**, your dealer can provide you with a better estimate of the overall time for this visit. As a matter of normal service process, the authorized Mercedes-Benz dealer will also check for other repair measures that might be applicable to your vehicle, which may increase the required working time. You will not be charged for other services or repairs unless so requested.
