(L6 and L7)

Conventional on-road Medium Duty Truck

Headlamp Adjustment Cap and Back Cover NHTSA 23V541 Hino M0430

This notice applies to your vehicle: VIN: 5PVNV7AV9N5*****

Dear Hino Truck Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Hino has certain 2022 and 2023 NE7A, NJ7A, NJ7B, and NV7A conventional trucks fail to conform to Federal Motor Vehicle Safety Standard No. 108, "Lamps, Reflective Devices, and Associated Equipment." You received this notice because our records, which are based primarily on state registration and title data, indicate that you are the current owner.

What is the Condition?

The subject vehicles are equipped with headlamps that are recessed in the hood. The underside of the hood has an opening for accessing the back of the headlamp assembly. This opening contains a back cover to protect the headlamp from water intrusion. In addition, the headlamp adjustment mechanism is also protected with a cap. There is a possibility that the back cover(s) and/or the headlamp adjustment cap(s) may not have been properly installed, which can result in headlight failure, or the headlights being adjusted incorrectly, increasing the risk of a crash.

What will Hino do?

Your authorized Hino dealer will inspect for the presence of adjustment cap(s) and back cover(s), and if missing, confirm headlamp aim, and install any missing cap(s) or cover(s). Please make an appointment with your authorized Hino Dealer to have the remedial work performed. This repair will be performed at **NO COST** to you.
