## URGENT SAFETY RECALL

This is an important Safety Recall. The remedy will be performed **FREE OF CHARGE** to you.

Certain 2020 to 2023 Model Year Porsche Taycan Vehicles  
Porsche Recall APB2 / NHTSA ID 23V-615

Dear [REDACTED]

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Porsche has decided that a defect, which relates to motor vehicle safety, exists in certain 2020 to 2023 Model Year Porsche Taycan vehicles.

### What is the issue?

Porsche recently determined that due to insufficient sealant, moisture could intrude into the high voltage battery pack. If this occurs, the driver will be alerted first via a yellow caution light, followed by a red warning symbol in the car's display, increasing the risk of a battery fire.

### What will Porsche do?

To remedy this issue, Porsche will conduct leak testing to detect the potential for leakage into the battery. If testing indicates the potential for leakage, the high voltage battery will be replaced at no charge to you. The remedy will take approximately one day to complete, but it may be necessary to make your vehicle available to your Porsche Center for a longer period of time. Your Porsche Center will arrange for alternate transportation if necessary.

### What should you do?

Please contact any authorized Porsche dealer to schedule an appointment to have this recall performed as soon as possible and to arrange for Porsche-provided alternate transportation, if necessary.
