Incorrect Shift Lever Assembly NHTSA 23V756
Hino M0440

This notice applies to your vehicle: VIN:

Dear Hino Truck Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Hino has decided that a defect, which relates to motor vehicle safety, exists in certain 2022-2023 NE7A, NE7B, NJ7A, NJ7B, NV7A, and NV7B conventional trucks. You received this notice because our records, which are based primarily on state registration and title data, indicate that you are the current owner.

What is the Condition?

Certain Hino vehicle models equipped with a 2500 series transmission may have a transmission shift selector with a park position (P), despite the fact that the 2500 series transmission does not contain a mechanical park mechanism. Therefore, if an operator sets the truck in the park (P) position and declines to use the separate parking brake, the vehicle could rollaway increasing the risk of accident or injury.

What will Hino do?

Your authorized Hino dealer will inspect the shift lever assembly of your vehicle and replace it as necessary. Please make an appointment with your authorized Hino Dealer to have the remedial work performed. This repair will be performed at **NO COST** to you.
