IMPORTANT SAFETY RECALL

Malfunctioning SCCM Expansion

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA US LLC has decided that certain [2024 model year (D2) RAM 3500 Pickup, 2024 model year (DD) RAM 3500 Cab/Chassis, 2024 model year (DJ) RAM 2500 Pickup and 2024 model year (DP) RAM 4500/5500 Cab Chassis] vehicles fail to conform to Federal Motor Vehicle Safety Standard (FMVSS) No. 571.108 – Lamps, reflective devices, and assoc. equipment.

It is extremely important to take steps now to repair your vehicle to ensure the safety of you and your passengers.

WHY DOES MY VEHICLE NEED REPAIRS?

The Steering Column Control Module (SCCM) on your vehicle ^[1] may have a turn signal lever debouncing time limit which is too short. Federal Motor Vehicle Safety Standard ("FMVSS") 571.108 S4 defines a Turn signal operating unit as "...an operating unit that is part of a turn signal system by which the operator of a vehicle causes the signal units to function." The SCCM in the suspect vehicles may lead to an inadvertent turn signal activation. An inadvertent turn signal activation may cause surrounding drivers to misunderstand the intent to change vehicle direction. **This condition can cause a vehicle crash without prior warning.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

FCA US will repair your vehicle ^[2] free of charge (parts and labor). To do this, your dealer will update the SCCM software. The estimated repair time is 30 minutes. In addition, your dealer will require your vehicle for proper check-in, preparation, and check-out during your visit, which may require more time. Your time is important to us, so we recommend that you schedule a service appointment to minimize your inconvenience. Please bring this letter with you to your dealership.

TO SCHEDULE YOUR FREE REPAIR, CALL YOUR CHRYSLER, DODGE, JEEP OR RAM DEALER TODAY
