SAFETY RECALL CAMPAIGN

SUBJECT:

HECU FUSE REPLACEMENT (SC284KH)

This bulletin provides information to replace the fuses of the Hydraulic Electronic Control Unit (HECU) and install an updated junction box label on certain 2015-2018MY K900 (KH) vehicles produced from December 18, 2013 through October 30, 2017. An engine compartment fire may occur in the area where the HECU is located. The HECU may experience an internal electrical short circuit condition that can result in overcurrent, thereby increasing the risk of an engine compartment fire while the vehicle is driven or while parked. Dealers are to install new fuses to prevent an electrical short circuit condition in the HECU's electrical circuit board. Customers may experience illumination of the Malfunction Indicator Lamp (MIL), ABS warning light, burning/melting smell, and/or smoke from the engine compartment. Follow the procedure outlined in this publication to install new fuse(s) and junction box cover label(s) on the applicable vehicle. Before conducting the procedure, verify that the vehicle is included in the list of affected VINs.

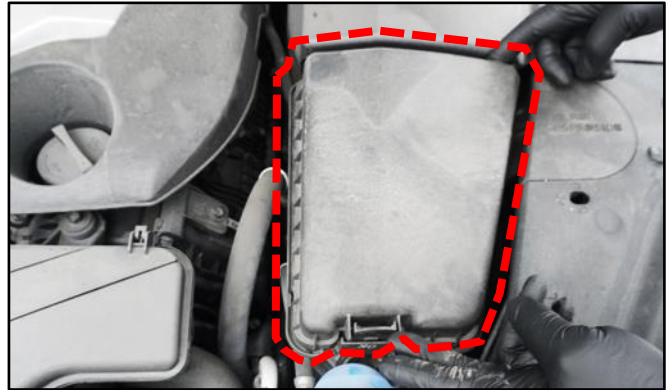

NOTICE

There is no charge to the vehicle owner for this repair. Under applicable law, you may not sell or otherwise deliver any affected vehicle until it has been repaired pursuant to the procedures set forth in this bulletin.

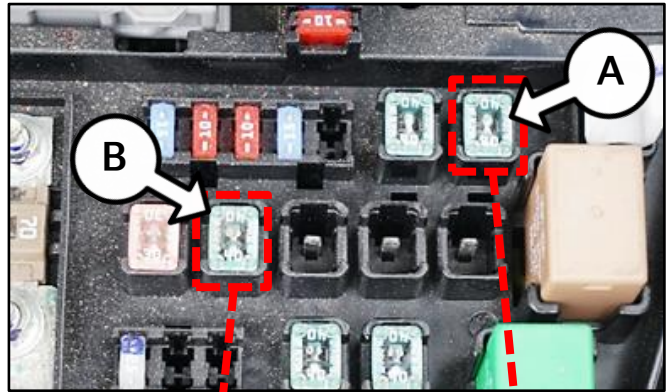

Repair status for a VIN is provided on KDealer+ (Service → Warranty Coverage → Warranty Coverage Inquiry → Campaign Information). Not completed Recall / Service Action reports are available on KDealer+ (Consumer Affairs → Not Completed Recall → Recall VIN → Select Report), which includes a list of affected vehicles.

Replacement Procedure:

1. Open the hood.
2. Remove the junction box fuse cover.

- 3a. Remove both existing HECU ESC1 40A (A) and ESC2 40A (B) fuses.

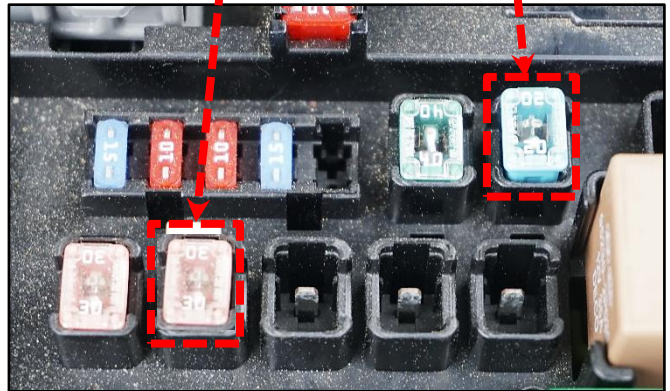

- 3b. Install new amperage fuses:

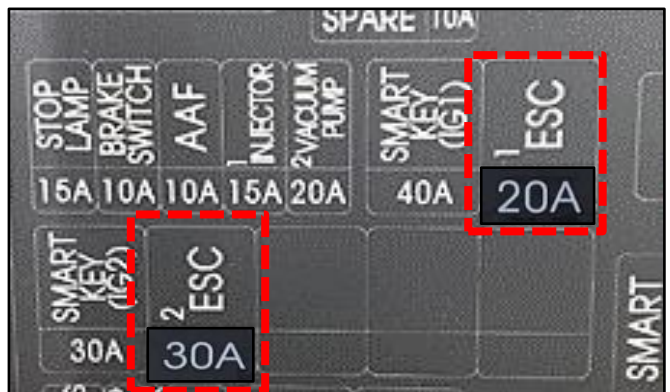

- ESC1 fuse (A) → new 20A
- ESC2 fuse (B) → new 30A

ⓘ IMPORTANT

Ensure to replace ESC1 fuse (A) with the 20A fuse and ESC2 fuse (B) with 30A fuse.

4. Adhere the new ESC1 20A and ESC2 30A labels to the bottom of the junction box fuse cover, as shown.

5. Reinstall all removed parts in reverse order of removal.

SUBJECT:

HECU FUSE REPLACEMENT (SC284KH)**AFFECTED VEHICLE RANGE:**

Model	Production Date Range
K900 (KH)	December 18, 2013 to October 30, 2017

REQUIRED PART:

Part Name	Part Number	Figure	Qty.
Fuse & Label Kit	91KH1 11010QQK	  <div style="display: flex; flex-direction: column; align-items: center;"> <div style="border: 1px solid black; padding: 2px; margin: 2px;">30A</div> <div style="border: 1px solid black; padding: 2px; margin: 2px;">20A</div> </div>	1

Note: Order Quantity will be controlled by a UIO% per dealer net submitted warranty claims. No VIN entry will be required. To keep the supply of parts flowing, please be sure to expedite warranty claim filing. As supply becomes more available, the maximum order quantity limit may be increased or removed.
