IMPORTANT SAFETY RECALL (Interim Notice)

**2004-2005 Porsche Carrera GT
Porsche Recall APA3 / NHTSA ID 23V 241**

Dear :

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Porsche has decided that a defect, which relates to motor vehicle safety, exists in certain 2004 to 2005 Model Year Porsche Carrera GT Vehicles.

What is the issue?

On affected vehicles there is a possibility that the spherical joints that connect the wishbone suspension on the front and rear axles in the affected Carrera GT cars may not meet Porsche's service life durability expectations. If these components are degraded, the joints could break without warning, affecting vehicle handling and increasing a risk of a crash.

What will Porsche do?

To help prevent this issue from occurring, Porsche is conducting a safety recall in two phases. In the first interim phase, your Porsche dealer will inspect the subject suspension components. If any abnormalities are detected, you will be advised not to drive the vehicle until the components can be replaced. If no abnormalities are detected, you can continue to drive the vehicle until the components can be replaced. In the second phase your Porsche dealer will replace the subject suspension components, free of charge.

What should you do?
Porsche recommends, out of an abundance of caution, to park your vehicle until the interim inspection can be carried out.
If you need assistance arranging storage or transporting your vehicle to the dealership for the inspection, please contact customer support as instructed below
