

IMPORTANT SAFETY RECALL

Month 2023

This notice applies to your vehicle, **VIN:** _____

Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2014 model year Buick Verano and Chevrolet Cruze vehicles. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

IMPORTANT

- Your vehicle is involved in GM safety recall N232408490.

Why is your vehicle being recalled?

In these vehicles, the left and/or right side roof-rail airbag (“RRAB”) inflators, which are located on the roof rails above the headliner, may contain a manufacturing defect that may result in rupture at the inflator weld joint. If the RRAB inflator ruptures at the weld joint, the compressed gas will escape, causing a partial inflation of the RRAB where sharp metal fragments may project from the inflator and enter or exit the vehicle. This can increase the risk of injury if a person is in or around the vehicle during the event.

What will we do?

Parts to repair your vehicle are not currently available, but when parts are available, your GM dealer will replace suspect left and/or right side RRAB modules. This service will be performed for you at **no charge**.

We are working as quickly as possible to correct this condition. When parts are available, we will send you another letter asking you to take your vehicle to your GM dealer to have your vehicle serviced. You can also check the status of this recall at: <https://my.gm.com/recalls>. If you have already paid for repairs for this condition, you may submit those charges using the reimbursement request form that will be provided with the next letter.
