

REGARDING VEHICLE POPULATION:

After reviewing both manufacturing and sales records for Model Year 2015 and 2016 Vehicle Identification Numbers (VINs), AM General believes the population of 977 vehicles is too broad given the manufacture dates provided in the initial filing. Based on our records, approximately 977 vehicles were assigned production VINS, however, only 525 vehicles were produced during the outlined build dates of December 22, 2014 – August 24, 2015.

Assumption: This information is included in the “Vehicle Information” section of the Form 573 (previous version attached for reference).

---

REGARDING INVOLVED COMPONENT DETAILS:

Part Number: PT017175

Part Name: Electronic Brake Control Module (EBCM)

Description: Electronic Stability Control (ESC) Software is programmed within the Electronic Brake Control Module (EBCM)—with the update of this module, the EBCM memory chip will recognize both power modes on the 2015-2016 MY vehicles, resolving both the noncompliance and related user interface concerns.

Assumption: This information is included in the “Description of Noncompliance Section” as there isn’t an “Involved Components” section in the form that I can see (previous version attached for reference).
