Update Detail Screen Text:

- Important Update for GM Recall No. A23-22424320
- This important update corrects a condition in the vehicle's virtual cockpit unit software that can cause the instrument panel display to intermittently blackout at vehicle startup or while driving. This update will complete the remedy for GM Recall No. A232424320 and no additional steps are needed after a successful update. You may also receive a letter providing additional details regarding this issue.
- During the update process, your radio may stay on up to 5 minutes after you exit the vehicle. This is expected behavior when an update package is onboard the vehicle. Do not service your vehicle during installation.
