Description of Defect :

Description of the Defect : The lefthand ("LH") turbocharger oil supply pipe in the subject vehicles can crack due to prolonged exposure to high ambient temperature in the engine compartment, potentially resulting in oil leaking onto the exhaust manifold.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : Oil leaking onto the exhaust manifold can increase the risk of an engine compartment fire.

Description of the Cause : The material used in the subject oil supply pipe is susceptible to cracking after prolonged exposure to high ambient temperatures in the engine compartment.

Identification of Any Warning that can Occur :
A. White smoke
B. Burning smell
C. Oil leaking onto ground surfaces

Involved Components :

Component Name 1 : Pipe & Hose Assy – T/C OIL FEED, LH

Component Description : Turbocharger oil supply pipe for 3.3L turbocharged engine

Component Part Number : 28240-3L100

Supplier Identification :

Component Manufacturer

Name : SAMBO Motors

Address : 142, Seongseodong-ro

Dalseo-gu Daegu Foreign States 42721
Country : Korea, Republic of

Chronology :

Please see Attachment A for the requested chronology of events leading up to defect decision.

Description of Remedy :

Description of Remedy Program :	All owners of the subject vehicles will be notified by first class mail with instructions to bring their vehicles to a Genesis retailer for replacement of the LH turbocharger oil supply pipe. This remedy will be offered at no cost to owners for all affected vehicles, regardless of whether the affected vehicles are still covered under Genesis New Vehicle Limited Warranty. Additionally, HMNA will provide owners of affected vehicles reimbursement for out-of-pocket expenses incurred to obtain a remedy for the recall condition in accordance with the reimbursement plan submitted to NHTSA on February 22, 2024.
How Remedy Component Differs from Recalled Component :	The remedy oil supply pipe material was changed to stainless steel for increased durability in high ambient temperatures.
Identify How/When Recall Condition was Corrected in Production :	The new stainless steel pipe material was implemented as a production running change in August 2021.

Recall Schedule :

Description of Recall Schedule :	Dealers and owners will be notified via certified mail according to the specified dates.
