Description of Defect :

Description of the Defect : It has been decided that the vehicles in the recall population may have a Suburban stove with LED backlight printed circuit boards (PCB) that are not fully coated. The lack of conformal coating in the connection passages between the layers of the PCB can allow liquid from the cooktop surface to accumulate which could result in a short circuit resulting in failure of the PCB.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : If the PCB fails, it can become overheated and the polyethylene cover of the lights can melt and possibly ignite causing a fire

Description of the Cause : The PCBs did not have the correct amount of conformal coating to properly seal the circuit board from contamination.

Identification of Any Warning that can Occur : Red Lights can become warm and show signs of melting. Also, the lights may turn red by themselves.
